

# Fats, Oils & Grease (FOG) Technology

WATER ENVIRONMENTAL CONSULTANTS completed an Environmental Protection Agency course on fats, oils and grease held at the EPA regional office in Chicago. WATER ENVIRONMENTAL CONSULTANTS have successfully worked in the treatment and control of FOG at the City of Chattanooga, Tn. regional waste water treatment facility (Moccasin Bend) for greater than 5 years. WATER ENVIRONMENTAL CONSULTANTS is very familiar with the FOG program recommended by the National Restaurant Association and has direct knowledge of the restaurant industry.

WATER ENVIRONMENTAL CONSULTANTS would recommend reviewing the information from Dr. John Parnell, St. Petersburg, FL. manager of pretreatment at:
